6 Opposed to *real* & as, originally, in *personal action* (or *plea*), an action wherein the claim was not the restitution of a specific thing (since the thing might be destroyed concealed, or transported beyond the reach of the law) but the recovery from the person concerned of compensation, i e of damages, distinguished from a *real action*, which claimed the restitution of the thing itself (being something indestructible and irremovable), and from a *mixed* action in which both restitution and damages were demanded. (This distinction is *Obs*, real actions having fallen out of use early in 17th c., and been formally abolished in 1833. See Sweet *Dict Eng Law* 24) Hence

b *personal property* (*estate*, or *chattels*), things recoverable in the personalty or by a personal action, i e chattels and chattel interests in land, etc., as opposed to *real property* (*estate*, etc), i e things recoverable in the realty, or by a real action, viz land (in the legal sense see LAND 4 c), and rights attached to the possession of land *Personal property* therefore includes generally all property except land and those rights attached to land which on the owner's death to his heir, corresponding in general (though not entirely) to the *movables* of Scotch, Continental, and Anglo-Indian law

Personal and real action represent L. *actio in personam* and *actio in rem*, but the *actio in rem* was originally distinguished by the nature of the right thereby asserted the terms were taken by Bracton into English Law but employed with considerable variations and confusions according to the process of execution obtained, that is, in reference not to the right asserted but to the relief afforded thereby The thing asked in the *actio in rem* was restitution of a specific thing which the law was always able to lay hold of and hand over, this limited it to land and rights recoverable over or in respect of land. But land and its rights were hereditary possessions, descending to the owner's heirs, hence *real property* became coextensive with or equivalent to heritable property and *personal property* came to include all other property; thus again restricted in early definition inasmuch as the question whether any particular property was testamentary and passed to the heir, or was non hereditary and passed to the executors or administrators, became the test whether the property or estate was real or personal; so that certain rights attached to land, came to be treated as *real or personal*, not according to the original application of these words, but according to the rule which had been established as to the descent of these rights severally Thus leases, of whatever duration, as well as mortgages and securities for money affecting lands or heritable property, which in Scotland are themselves heritable and descend to the heir in England go to the personal representative, and are classed as personal estate. [Note *Petitoe stoes* was in 1711 c. taken by some (e g Skinner 1671) as = *Petitoes* = *petits*, little goose] the gel lets of a goose, wh ch is thus given in Cotgrave *La petite oye* the giblets of a Goose: also the bellie, and inwards or entralls of any beast, or bird whatsoeuer. The extended sense is the second part of this definition is not mentioned in that dictionary (who has a number of transferred senses of a different kind) and it may really have been an English extension and may, wh n it first appeared, have had the meaning of the giblets of a goose was extended to the analogous parts cut off in dressing a pig or other animal. Among these were the feet to which the name *petitoes* would seem naturally to point n d to which it may soon have been appropriated (cf the quot from Florio 1598) But if this is the history it must have taken place before the appearance of a pettitoe since the first example of a pyges pettytoe is of 1555 and *pettytoes* was evidently applied to toes or feet by 1589 It is to be noted that Cotgr also has *Petitoe* [Fr] the garbage of the throat of old words but th s is not given by Godefroy and may be ome error It may be worth inquiring whether *petitoe* was n ot g s ample adoption of Ott *Petitto* little petty or nil (Florio quasi 'petites petty items.]

[*Note.* The phonological relation of *puwe*, *pyue*, *peue*, to OF *puye*, *puie*, offers difficulties. For the sense, cf 16th c. Dutch (Brabantish) *puye* or *puyde* (which must have been taken from OF) Plantin 1573 has '*een Puye*, vn lieu enleué au marché, ou contre l'hostel de la ville, pour proclamer arrests, ou publier ordonnances ; Kilian 1599, '*Puye, puyde*, podium, pulpitum, suggestus, suggestum, rostra, suggestus lapideus', Hexham 1678, '*Puye*, a Pue, or place elevated in a Market to Proclaim or to Cry of any thing'; cf mod.Du *de pui* the front of a town-hall or other building Of the L. sing *podium*, Du Cange gives one of the mediæval senses as 'Lectrum, analectrum in ecclesia, ad quod gradibus ascenditur , i e. a lectern or reading-desk in a church, to which one ascends by steps; in Italian, Florio (1598) has '*poggio*, a hill or mounting side of a hill, a blocke to get vp on horsebacke (So occasionally in Eng. *horse pew* = horse block: see *N & Q* 10th s. IV 27, 8 July 1905.) These point to the series of senses base or raised structure to mount or stand on , raised place to stand on in making a public speech or proclamation, 'stump , rostrum; esp. in a church, a raised lectern, reading-desk, pulpit, or the like , whence, generally, place elevated above the floor for any purpose; particularly, sitting place on a raised base. But it is not impossible that this last sense, which seems to be peculiar to Eng , may have originated in that of 'balcony, balustrade' (see the Etymology), esp if the name was first applied to a range of seats raised against the wall.]

PH, a consonantal digraph, having usually the phonetic value of F. It was the combination used by the Romans to represent the Greek letter Φ, φ or φ, named Φί, *Phi* This letter, cognate with Skr *bh* (and so with Germanic *b*) was in early Greek written ΠΗ, and was a real aspirated *p*, it was subsequently often written ΠΦ, *πφ*, and had then prob. nearly the same sound as German *pf* but by the second century B C it had sunk into a simple sound, prob. the *bilabial* spirant (the sound made in blowing through the lips) As the Roman F was dentilabial, like mod Eng *f*, the Romans in earlier times represented the Greek Φ not by F, but by PH, in the time of the Emperor Severus, however, the two began to be confused, and from *c* 400 were treated as identical Hence in late popular and mediæval Latin, and in the Romanic languages, *f* was often substituted, as it is now regularly in Italian and Spanish (e g *fantasma, filosofia, fotografo*) This was also the case to a great extent in Old French, and in Old and early Middle English (see PHARISEE, PHILISTEE, PHANTOM, PHEASANT), but there, under the influence of the Latin forms most words so written were subsequently altered back to *ph*, the preponderance of which is particularly notable in Gower Exceptionally the *f* remains in mod Eng, as in *fancy* (= *phantasy*) *fantastic* In all modern words of Greek derivation (e g in *phano*, *phibr*, *phosphor*, *phrase*), *ph* alone is found.

One co sequence of these conditions was that in the 15th 16th, and 17th *c ph* was frequently substituted for *f* in words not of Greek origin esp in words that were some what rare the scribes apparently taking *ph* as a more learned and thus presumably more correct spelling Many instances of this will be found under F and a long the cross references given below as in *phalucce phan phance phang pharman ph lasor philtorte, philimot* etc This spelling is often retained in *blanke = blanke* and in certain interjections *phew! pha! pho!* where perhaps it may have been adopted to express the simple labial (lip-breath) consonant the sound made in blowing as distinct from the labio-dental *f*. Moder n philologists e g Mr A J Ellis in his Palæotype have used *ph* as the symbol of the labial sound of Greek had the initial combination *φ*, in Roman spelling *phth* This was difficult for the Romanic nations, and in the only early word of this *phth*, *phthisicus*, was reduced to *th*, or simple *t* and in PHTHISIC, etc. In mod. words *phth* are now normally pronounced *ft* in Eng the *ph* is generally mute and the *th* pronounced ; but in scientific words now by scholars pronounce *ph* a combination which is quite as easy as *sf* in *sphere*

Ph (pronounced f) is also used to represent Hebrew ף (without dagesh), and even initial ב (according to the Masoretic pointing with dagesh) n proper names which have come to us through a Greek form with Φ see PHARAOH PHILISTINE, SERAPH In Roman spelling of Indian languages *ph* represents the true aspirated *p* (ष of Sanskrit) and this is occasionally the origin of *ph* in alien words cf. PHULKARI

Philo- (filo), before a vowel (or *h*) usually **phil-** (fil), repr Gr. φιλο-, φιλ-, combining form from root of φιλ-εῖν to love, φίλ-ος dear, friend (cf *μισο-*, *miso-*, from *μισ-εῖν* to hate, *μίσ-ος* hate, hatred). The number of compounds so formed in Greek was very great, usually they were adjs., having derived sbs. and other words, and capable themselves also of being used as sbs , e g φιλό-σοφος loving wisdom, hence φιλοσοφία, φιλοσοφὸς, φιλοσοφεῖν to philosophize, etc.; φίλορνις fond of birds, φιλορνιθία fondness for birds, etc. Among these were some formed on national names, as φιλέλλην loving the Hellenes or Greeks, φιλολακων loving the Lacedæmonians Many of the Greek compounds have come down (frequently through Latin, usually with formative suffixes) into English; and, on the model of these, *philo-* (*phil*) has been employed to form new compounds, the second element of which is properly Greek, but often Latin, and even, esp in nonce-words, English or in Eng use *Philo-* has thus become a living element, esp, with national names, as *philo-German*, *philo-Russian*, *philo Turk*, and the like.
Examples are *phil-aristocracy*, *-athletic* [cf Gr. φιλαθλητής], *-hymnic* [Gr φιλυμνος] (loving hymns), *-orthodox*, *-phyic botanic*, *botanist*, *cathartic*, *-catholic*, *-dramatic*, *-dramatist*, *-felon*, *-garlic*, *-mathematic(al)*, *-musical*, *-mystic*, *-mythology* (love of fables), *-mythy* [Gr. φιλομυθία love of talk], *-parson*, *-peristeronic* (pigeon-fancying), *-pig*, *-poet*, *-publican*, *-radical*, *-stagfoot*, *-theorist* [cf. 1 A reputed solid substance or preparation supposed by the alchemists to possess the property of changing other metals into gold or silver, the discovery of which was the supreme object of alchemy Being identified with the ELIXIR, it had also, according to some, the power of prolonging life indefinitely, and of curing all wounds and diseases

3 The *lapis philosophorum* occurs in works attributed to Raymund Lully (1234 1315) and in those of Arnoldus de Villa Nova (1240–1314). Probably it was used earlier; it appears in various mediæval works of uncertain age or doubtful authenticity e.g. in the *Clavis Majoris* 5 *splendid* attributed to Artefius or Artesius, whose date has been put by some at 1130. In some of these also we find *lapis philosophicus* & *philosophicalis* &c But the earlier works (e g the mediæval Latin *De Investigatione Perfectis Magisterii*) passing as translations from Geber (VIII c. M c. 32 *Jabir* 4) usually refer to it simply as *Lapis* the Stone or *noster lapis* our stone Albertus Magnus (1205 82) who doubted the transmutation of metals, refers to it as *lapis quem philosophi laudant ubiq* or the stone which the philosophers everywhere laud and *lapis quem homorant philosophi* It is thus possible that *lapis philosophorum* originated later as an identifying adjunct to *lapis* as if the Stone of which all the philosophers speak the Stone of the philosophers, and that the latter phrase grew at length into a specific name or title It will be seen that the correct form is not *Philosopher's* but *Philosophers stone*]

This use of the term and the theory connected with it were introduced by Stahl in 1700 in his ed of Becher's *Physica Subterranea* of 1669. The latter had used φλογιστόν in the sense used by Sennert (in 1619) in the sense of the being in flammable' inflammability or combustibility as a *quality* of some substances, but not regarded as a substance or principle. The existence of phlogiston was denied by Lavoisier in 1772, and though stoutly maintained by Priestley, the belief in it was generally abandoned by 1800.

The application of the term has tended continually to be narrowed It originally (from Arist) included the study of the whole of nature (organic and inorganic) and even included spirits (God angels etc) among its objects. In the course of the 18th cent it became limited to inorganic nature, and then by excluding chemistry it acquired its present meaning see 2

2. In current usage, restricted to that science, or group of sciences, treating of the properties of matter and energy, or of the action of the different forms of energy on matter in general (excluding Chemistry, which deals specifically with the different forms of matter, and Biology, which deals with vital energy) See quots. 1900.

Physics is divided into *general physics*, dealing with the general phenomena of inorganic nature (phenomic molecular physics, physics of the ether, etc) and *applied physics* dealing with special phenomena (electricity, relation to terrestrial magnetism, etc). There is a tendency now to restrict the word to the former group.

manifestations of the same fundamental energy 1900 W Watson *Textbk Physics* 2 We are led to define Physics in its most general aspect as a discussion of the properties of matter and energy It is, however, usual to exclude the discussion of those properties of matter which depend simply on the nature of the different forms of matter (Chemistry) as also the properties of matter and energy as related to living things (Biology) The line of demarcation separating Physics and Chemistry has never been very clear, and of late years has practically vanished.

Pick (plk), *v*[1] Forms α. 17 pio(l)an, 4 pyken (§ -yn), piken, 4–9 *Sc.* and *north. dial* pike, pyke. β. (7 & 9 pik), 5–7 pioke, 6 pyoke, pioque, *Sc.* pyk, pik, 6– pick. [This vb. is found with long and short *i*, *piken*, *pik(e)en*, *pyke*, *pyk*, of which the former is app. the earlier, but the latter the surviving form in Standard Eng., though *pike* (paik) survives in the same senses in northern and some midland dialects. The earliest known trace of the word is in the vbl sb *pecunge* (? *i* or *i*), a gloss on L *stigmata*, in Corpus Gloss *c* 725, implying a vb *pecgan* (? or *i*) or *pīcan* to puncture MS. F. of the OE Chronicle has, anno 796, a verb uncertainly read *pycan* or *pytan*, more prob. the latter. Otherwise no examples have yet been found before 1300. In sense 1 there is evident connexion with Pick *sb*[1] 1, Pike *sb*[1] 1, and (esp. in 1 b) some agreement of sense with F *piquer* (which is similarly related to *pic*); but the sense-development in Eng is very different from that of F. *piquer* and the cognate Pr, Sp, Pg. *picar* and It *piccare*, which adhere always more or less closely to the sense 'puncture, pierce, prick, sting', a notion which in Eng. barely enters into sense 2, and is entirely absent from the other senses. On the other hand, verbs akin in form and meaning occur in the Middle and Modern stages of the Teutonic langs. cf. late ON. (13th c.) *pykkva*, *þykkva* 'to peck, prick' (Vigf.), Norw *pykka*, Sw. *pycka*, Da. *pykke* to pick, peck, pierce with pointed tool, also to beat, palpitate, throb; MLG, LG, E.Fris. *pokken* to pick, peck, MDu *pucken* to pick, peck as a bird, pierce or strike with beak, cut with sickle or scythe (Kilian); Du. *pikken* to pick, peck; mod.Ger (from LG) *pucken* to peck at a bird, pick or puncture with a sharp tool (also *piken*, *pucken*) Compare also Welsh *pigo*, Corn. *piga* 'to prick, sting, pick, peck' (said e g of a pin, a thorn, a bird), which goes with *pig* sb fem. 'anything pointed, sharp point, beak, bill, nob'; with similar forms in Breton, and a large family of derivatives and connected words, from the root *pik-*. All these words in the various languages go back to earlier forms in *pik-*, *pik-*, *pikk-*; but the question of their ulterior history and relations is involved in obscurity and conflicting difficulties. The Romanic verbs point to an original form **piccāre*, related to **piccus*, Sp *pico*, It. *pic*, for conjectures as to the origin of which see Pike *sb*[1], note. In OE., *pīcung* is supported by the sb. *pīc*, *pīc*, Pike]; but there are no cognate words in the other Teutonic languages in their early stage. In Welsh and Cornish, however, *pigo*, *pigo*, appear to be native words; going back, with the cognate sb. *pig*, to a Brythonic root *pik-*, corresponding perhaps to a proto-Celtic **pīk-* (see Pike *sb*[1], note). The modern Irish and Gaelic *pic*, *pioc*, and their derivatives are, of course, from English.

The two forms *pick* and *pike* might have been treated as separate words, as in the sbs. Pick[1], Pike[1] But in the inflected forms of the vb. in early quots., the length of the *i* is often doubtful, so that the separation would be difficult; and in modern times, *pike* exists only as a dialect form of *pick*. It is therefore most convenient to combine the two under the current literary form *pick*, separating the examples, where possible, under α and β, and stating in what senses *pike* continues in dialect use. Sometimes there is differentiation; in S. E. Scotch, *pike* is distinct from *pick*, and used only in senses 2, 2 b, 3, 3 b; 1 but in other Sc. and Eng. dialects, and in earlier Sc, *pike* is used in other senses also.]

[*Note.* The chronology of the word in French and English, with the fact that our earliest instances refer to the Continent, and are sometimes in the French form *pique nique*, show that the word came from French (although some French scholars, in ignorance of these facts, have, in view of the obscurity of its derivation, conjectured that the French word was from Eng.) Hatzfeld Darmesteter merely say 'Origin unknown.' The *picnic* appears to be borrowed from French. Scheler mentions several conjectures, amongst others that of Bonifacc (18) 'repas où chacun *pique* au plat pour sa *mique* (*nique* taken in the sense of small coin).' Others think it merely a rhyming combination formed on one of its elements. In Foote's *Nabob* (1777) Act 1, one of the characters uses *nick nack* for *pick nick*: intended perhaps to show that *pick nick* was still a little known word, liable to be confounded or associated with better known native words or combinations, such as *knick-knack*. But cf. Pickwickery quot 1803, 'pick nickery and nick nackery.']

Pier² (pɪəɹ). Forms: 2, 4 **per**, 4–8 **pere**, 5–8 **peer**, (6 **piere, pyre, pyerre**), 6–7 **peere, peir, pire**, (8 **peor**), 6– **pier**. [In 12th c. *per*, rendering med.L. *pera* (prob. *pēra*), of unknown origin.

It was suggested by Lambard, Spelman, and Du Cange, that *pera* was derived from OF. *piere* or L. *petra* stone; but this satisfies neither the phonetics nor the signification. There is an OF. (Picard and Flamand) word *pire* (rarely *piere* Godef.), meaning a breakwater or barricade of piles, a weir on a river, a boom defending a harbour, which might perh. have given the sense, but it is difficult to equate the form with *pēra* and *pēr*.]
